

eBoost PASS®

eBoost PASS® Product Line offers a wide selection of highly reliable and customisable inlays and eCovers for electronic passports.

eBoost PASS® : The best choice of ePassport inlays or eCovers for durability, performance, flexibility and security.

- Up to 10 years lifetime thanks to superior durability : patented inductive coupling technology
- Superior product functional performance : internal R&D resources for design and testing
- Wide range of options and unique security features
- Secure and reliable manufacturing operations with business continuity plans

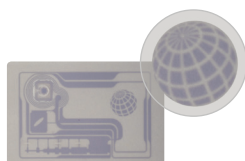

INLAY & eCOVER

ePassport inlays are available in Teslin (synthetic paper) with various types of hinge (full, open or specific) and cover materials. SPS can deliver any specific customer formats.

OPTIONS
